

# TFCZ

## Brand Manual

## LOGO USAGE

# PRIMARY LOGO

The primary logo consists of two elements: a symbol (shield) and a wordmark.

This logo should be used most frequently.

The primary logo is the main expression of our brand. It is the most visible representation of who we are. It should be used respectfully and according to the guidelines.

Depending on the background, logo can be plain or feature graphic device around the symbol.

\*Check logo colours and usage in the next pages.

Wordmark

② On dark background

**TISCHFUSSBALL  
CLUB  
ZÜRICH**

## LOGO USAGE

# SECONDARY LOGO VERSIONS

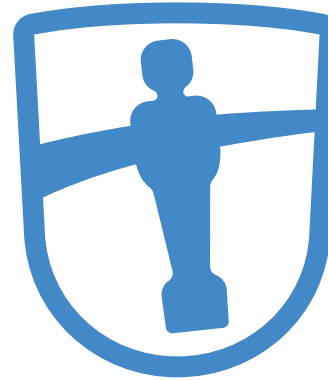

The secondary logo consists of a symbol (shield) and an abbreviation. This version should only be used when necessary. It should only be used with the agreement of the TFCZ team.

The symbol can only be used separately from the wordmark or abbreviation in rare cases. In cases like fav icon, or mobile icon.

Please contact the brand's representatives for more information.

Abbreviation

TFCZ

Symbol

Symbol

## LOGO USAGE

# SECONDARY LOGO VERSIONS

Use the logo version with the white graphic device around the symbol and TFCZ blue inside on a dark background.

Do not use the black-and-white version on darker backgrounds unless it is necessary.

## LOGO USAGE

# BLACK AND WHITE

The black version should be used for a white background or shades of grey.

One-color logos should be used when reproducing in one color, either black or white.

For a white background, use the black version.

For a black background, use the version with the graphic device around the symbol and the white wordmark. Do not invert the colors for the white version.

**Note:** Only use the black and white versions supplied, and do not recolour other versions of the logo to white as this logo has been optically adjusted.

## LOGO USAGE

# BLACK AND WHITE

The same rules apply to the secondary logo and symbol.

For a white background, use the black version, and for a black background, use the version with the graphic device around it.

## LOGO USAGE

# LOGO SAFE ZONES

1. Horizontal - The clear space is determined by the height of the Z in the logo.
2. Vertical - The clear space is determined by the width of the Z in the logo.
3. Symbol - The clear space is determined by the space between shield and figure in the middle - on the left side.

## LOGO USAGE

# LOGO COLORS

The best way to use our logo is on a white or light background.

Using TFCZ blue as a background is preferred over gold.

Use the logo on white backgrounds and backgrounds less than 40% gray, in both color and black-and-white versions.

Use the logo with the graphic device around the symbol and the white wordmark on backgrounds darker than 40% gray, in both color and black-and-white versions.

Note: Only use the supplied black-and-white versions, and do not recolor other versions of the logo to white, as this logo has been optically adjusted.

## LOGOS AND MARKS

# LOGO DOES AND DON'TS

To ensure the logo remains recognizable and consistent in style, it is recommended to use the graphical display of the logo from this file.

Do not re-create it or edit it.

Do not use a different color scheme, disproportionate transformation or rotations.

Maintain contrast between the background and the logo.

Do not resize or change the position of the Symbol and Wordmark.

Do not distort the logo. Any resizing must maintain its proportion.

Do not use any other fonts. Even if it looks similar to the original wordmark, do not use it.

Do not recolor the logo or use gradients.

Do not angle.

Don't add shadows underneath the logo or textures to logo.

Do not skew any part of the logo.

Do not invert the colors. Only use the provided versions.

## LOGOS AND MARKS

# LOGO DOES AND DON'TS

Correct use of color will enhance the impact of the TFCZ logo.

The guidelines below provide standards for placing the logo on a background color.

Use the logo on white or light backgrounds that complement it.

Use background colors provided.

Use the provided gradients.

Use logo with graphic device around it on a TFCZ blue background.

Use logo with graphic device around it on a dark background.

Use logo with graphic device around it on a TFCZ gold background.

COLORS

# SECONDARY COLORS

TFCZ accent colors are used to accentuate elements such as alarms, bullets, and links.

Accent colors should be used subtly. Details with accent colors should make up no more than 5% of the entire visual.

Black and white should mostly be used for typography. Otherwise, use primary colors or secondary and neutrals for typography and iconography.

TFCZ Accent Colors

|     |         |     |         |     |         |

COLORS

# PRIMARY COLORS

The two key colours are TFCZ Blue and TFCZ Gold. These two colours should work in concert in all communications and branded materials.

TFCZ has an extended palette of colours; three additional blues and one additional gold.

TFCZ Neutral can be used for backgrounds.

Secondary colours should only be used if the primary colours are present in the same context and should not be used alone in a single context.

Use CMYK for all print and RGB for digital material

## COLORS

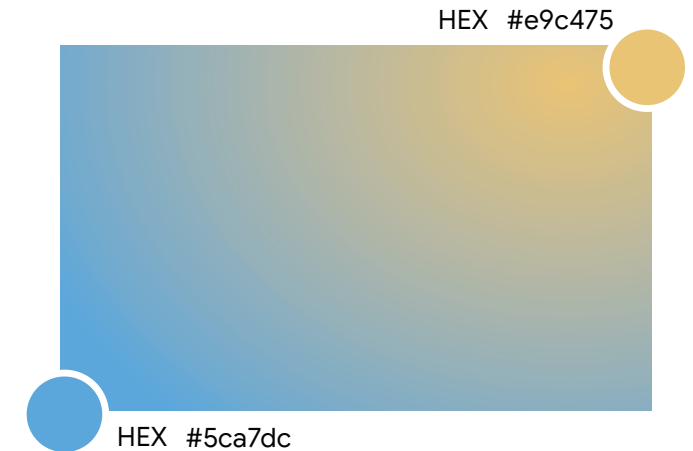

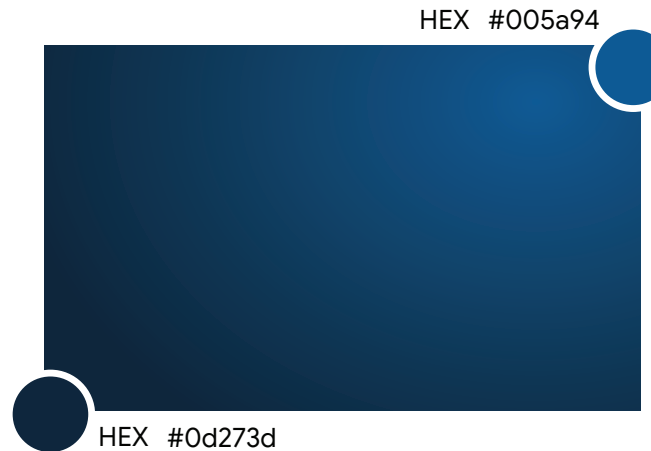

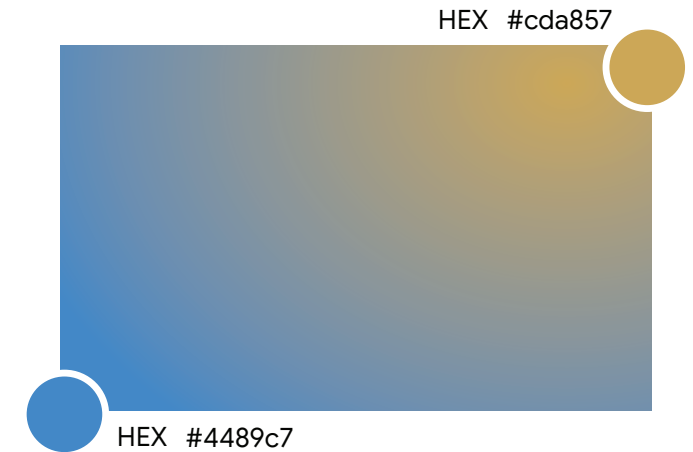

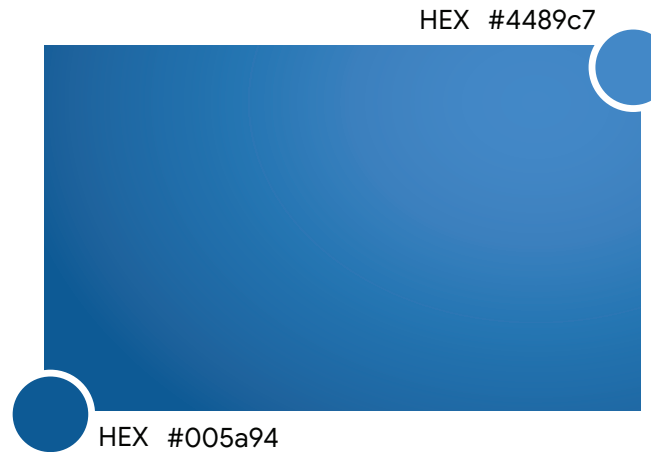

# GRADIENTS

Gradients can be created using different combinations of main colours and their shades. Depending on the application, either a radial or a linear gradient may be more suitable.

Use the two gradient colours to create the desired effect.

Do not use more than two colours in a gradient.

Use gradients mostly for backgrounds,

## VISUAL ELEMENTS

# TYPOGRAPHY

TFCZ uses the Nunito Sans typeface.

It has the following weights: Extralight, Light, Regular, Semibold, Bold, Extrabold and Black with corresponding italics.

In the absence of Nunito Sans type should default to similiarmodern, sans serif font.

## Nunito Sans

Nunito Sans Extralight and *Italic*

Nunito Sans Light and *Italic*

Nunito Sans Regular and *Italic*

**Nunito Sans Semibold and *Italic***

**Nunito Sans Bold and *Italic***

**Nunito Sans Extrabold and *Italic***

**Nunito Sans Black and *Italic***

## VISUAL ELEMENTS

# PATTERN

The pattern should be subtle and blend nicely with the background.

It can be used for print and digital applications

The colour can be adjusted, but it must always be lighter than the background.
